Tax Billionaires Toolkit

Summary: Billionaires continue to grow richer than ever before, making more in an hour than most Americans can hope to make in a lifetime. Estimates indicate that the world could see its [first ever trillionaire](#) within the next decade. But despite this unprecedented wealth, the ultra-rich frequently pay lower tax rates than middle class workers like teachers and firefighters.. At the same time, Republicans in Congress are fighting to give the rich **permanent** tax breaks and to stop the IRS (Internal Revenue Service) from enforcing taxes on wealthy tax cheats making over \$400,000 a year. It's time to end the two-tiered tax system that enables the rich and corporations to dodge and duck taxes while the rest of us pay our fair share.

Sample Content

- Billionaires broke records in 2023 with \$5.2 trillion in collective wealth—that's up from \$2.3 trillion since 2017 thanks to the Trump tax law. It's time to #TaxTheRich.

- Jeff Bezos made millions of dollars an hour in 2023 – that's more than the average American can hope to make in a lifetime.

There's no reason he should be paying a lower tax rate than people making minimum wage. #TaxWealthLikeWork

- We're sick of watching Elon Musk beef with other billionaires and fool around on social media.

We'd rather watch them all pay their fair share of taxes. #TaxBillionaires

- FIVE #BigPharma execs from Moderna have become billionaires because of the corporations' taxpayer-funded vaccine.

They should be paying their fair share of taxes, just like the rest of us.

- The IRS will collect \$560 BILLION more from wealthy tax cheats thanks to the enforcement funding from the #InflationReductionAct.

GOP lawmakers are working hard to roll back that funding to protect their billionaire buddies.
